

Edgar Rafael Galvan Prado

Front-End Software Engineer | React • Vue • NextJS • TypeScript • JavaScript

edgarrafa@gmail.com | +52 3321804103 | [LinkedIn](#)

Front-End Software Engineer with 5+ years building scalable, high-performance web applications using React, Vue.js, Next.js, and TypeScript. Expert in component-based architecture, design systems, and data visualization dashboards with proven impact: consolidated analytics platforms reducing development time by 30%, architected component libraries used by 20+ web sites, and achieved 85-90+ Lighthouse performance scores. Specialized in Web Components (Stencil.js), GraphQL/REST API integration, and comprehensive testing strategies (Jest, React Testing Library, Vitest) ensuring 85%+ code coverage.

Technical Skills

Frontend: React, Vue.js, Next.js, Angular, TypeScript, JavaScript (ES6+), HTML5, Stencil.js, Web Components.

State Management: Redux, Zustand, Context API, React Query.

Styling & UI: CSS3, Sass, Tailwind CSS, Bootstrap, Material-UI, Styled Components, Responsive Design, Mobile-First.

Testing: Jest, React Testing Library, Vitest, Unit Testing, Test-Driven Development.

Tools & DevOps: Git, GitHub, CI/CD Pipelines, Storybook, GraphQL, RESTful APIs.

Architecture: Design Systems, Atomic Design, Component Libraries, Modular Architecture, Performance Optimization.

Best Practices: Accessibility (WCAG 2.1, ARIA), Cross-Browser Compatibility, SEO, Code Reviews, Agile/Scrum.

Professional Experience

Software Engineer II – Meltwater (Sept 2024 – Present)

- Engineered high-performance Vue.js analytics apps processing millions of data points in real-time.
- Developed framework-agnostic Web Components with Stencil.js, reducing dev time by 40%.
- Enhanced multi-platform publishing tools supporting 10+ social media channels.
- Consolidated fragmented analytics dashboards into a unified platform, reducing overhead.
- Designed modular charting systems increasing code reuse by 30% across products.
- Implemented testing strategies achieving 85%+ code coverage maintaining quality releases.

Software Engineer – EPAM Systems (Jul 2021 – May 2024)

- Contributed to React atomic component library with 50+ components used by 20+ web sites.
- Built responsive Next.js apps with GraphQL integration achieving 90+ Lighthouse scores
- Created utility libraries bundled with Webpack, published to npm across 10+ projects
- Implemented Jest and React Testing Library tests achieving 90%+ coverage, reduced bugs 35%
- Documented components with Storybook reducing developer onboarding time by 50%

Internships (Jul 2020 – Jun 2021)

- Developed Next.js web applications using component-based architecture in startup environment
 - Owned full features critical to the development of the application
-

Education

Bachelor's in Electronics Engineering – Instituto Tecnológico de Estudios Superiores de Zamora (Michoacán, México, 2021)

English Certificate – Centro de idiomas del Instituto Tecnológico de Zamora (Michoacán, México)

Key Achievements

Design System Leadership: Architected component libraries and design systems used by 20+ web sites, reducing development cycles by 50% and ensuring UI consistency across enterprise applications.

Performance Optimization: Consistently achieved great Lighthouse scores through code splitting, lazy loading and modern performance best practices

Testing Excellence: Champion of test-driven development with 85-95% code coverage, reducing production bugs by 35%.
